

Stafford Chiropractic and Animal Cracker

Office hours are 9-6:30 Monday – Friday or by appointment

I have been a chiropractor in Wisconsin since 1999 and have been in New Berlin since 2006. I treat humans and animals presently. Primarily humans, Thursdays are dedicated to the animals.

I offer spinal manipulations to all ages. I also offer adjunctive therapies. Intersegmental traction, electrical muscle stimulation, heat, cold, exercise rehabilitation, cupping, dry needling, class IV cold laser, compression therapy, blading, taping, DOT exams and testing. I have a website; staffordchiro.net that patients can access me from by email or text. I am in most insurance plans and people can choose to have a cash plan. I treat anything from sports injuries, seniors, infants, wellness patients, weekend warriors, auto accidents, workers comp, disc related issues, arthritis, headaches, neck pain, shoulder and knee conditions.

The animal part of my business is dedicated to Thursday and sometimes Saturdays or by appointment. I offer an initial neuromusculoskeletal exam and manipulation if warranted. I also offer animal exercise and rehab and Class IV cold laser. Each of the services have been taken at an accredited post grad school and I am certified to practice in the state of Wisconsin. If a condition is out of my scope of treatment I refer out to veterinarians. I see each client independently and do not allow other animals to come into the building at the same time. I also do not see humans at the same time to decrease risk of any altercations. The owners are instructed to text me when they arrive and I will let them know that it is clear to enter. The animals are to remain on leash until in the exam room.
